At a Glance

This release of e-Tag contains a number of enhancements to improve your user experience. These include:

- Buyer's Tag Search For Vehicle Message
- Fleet Tag Quantity
- Contact Us Link

Buyer's Tag - Search For Vehicle Message

A message now displays on the Buyer's Tag - Search For Vehicle screen when you enter a VIN that is not 17 characters or when the VIN entered is not found in the system . This reminds you to validate the VIN before creating the tag. You may correct the VIN, if necessary, or select **Yes** or **No** to continue with the search.

- If you select Yes:
 - The application searches for the VIN in the system and, if found, returns the vehicle information.
 - If the application finds no vehicle information for the VIN, it displays a second message with the option to select **Yes** or **No**.

- If you select Yes, please enter the vehicle information on the Enter Vehicle Information screen.
- If you select **No** at either message, the application returns you to the Search For Vehicle screen so you can re-enter the VIN.

Fleet Tag Quantity

When issuing Fleet Buyer Tags the application can now create 50 tags at one time.
